SUMMARY LANGUAGE: Chinese; French; German; Russian; Spanish

AB Bioactive peptides are specific protein fragments that have positive effects on physiological processes and ultimately may influence health. These peptides are inactive within the sequence of the parent protein but are released during proteolysis or fermentation. In this review, biologically active proteins and bioactive peptides from eggs are discussed. Aspects considered include: egg white proteins (ovalbumin, ovotransferrin, ovomucoid, ovomucin, lysozyme, avidin, cystatin,
